Hospitality Software Buyer's Checklist

Most essential features of a
modern accounting system

Sage

Accounting systems are not something that you change or replace often. However, as your hospitality organization must nimbly navigate complex challenges, you reach a point where manual processes drain your productivity, and you struggle to analyze your growing range of financial and operating data. Lack of financial visibility hinders insightful decision making, which in turn hinders performance. At this point, you need a system that understands hospitality businesses and leverages the latest technology advancements.

At a minimum, a modern accounting system for hospitality businesses should automate and streamline core financial management functions such as accounts receivable, accounts payable, and financial close. But you can hardly fuel your organization and need for accountability and transparency by simply automating the minimum. Hospitality, in particular, has accounting, tracking, and reporting needs that require specialized functionality in their financial management systems.

Hospitality accounting checklist

Hospitality organizations typically consist of multiple entities across brands, properties, franchise concepts and locations. This creates complex intra-entity workflows that are typically manual and tedious. Additionally, hospitality organizations need real-time and flexible reporting for each entity and rolled up to the company level. To help you evaluate hospitality accounting software vendors and ensure that you get the modern features you need in your new system, we've created the Hospitality Accounting Software Buyer's Checklist. We've worked together with hospitality companies like yours to determine the features and functionality that most effectively streamlined processes, saved time and resources and positioned them for growth. This checklist includes the must have features of a modern accounting system formatted in a way that makes it easy for you to do a head-to-head comparison of multiple software vendors. Simply use the blank columns for vendor comparison.

Efficiently manage financials for multi-entities

Managing the financials for multi-entities can be time and resource intensive. Hospitality businesses need to be able to use one chart of accounts for all entities to ease monthly consolidations, increase accuracy and enable financial visibility across stores, locations, properties and rolled up across the whole company.

	Sage Intacct
Simplify entity setup, inter-entity transactions, and multi-entity reporting through single, primary GL chart of accounts.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Track revenue and spending for each period, store, concept and location.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
A unified chart of accounts across multiple entities for quick and easy consolidations.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Compare and analyze financial performance at each store and entity level, or rolled up to the entire business.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Access with 24/7 availability from any mobile device for instant visibility and control.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Report quickly and easily on your dimension attributes for contextual richness (i.e. labor category, item category, meal type, location, etc.).	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Instant visibility for your team through role-based, customizable dashboards to track, manage, and send reports to restaurant and operations managers, executives and franchisors.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Track and report on spending to budget, and actual results.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Automatically schedule reports for timely, proactive monitoring of business KPIs.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Customizable financial information for best insight across cost of goods, labor cost percentage, average daily rate, occupancy rate, revenue per available room, and more.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Automated, flexible financial processes

A modern general ledger is more than a standard chart of accounts. It lets you manage, analyze, and present your financial information the way you want, without adding complexity to your chart of accounts or using external reporting tools. Your accounting system should accommodate your optimal organizational structure and workflows rather than limit your operational flexibility by forcing you to implement software you don't want in a bundle or re-write custom code. Your system should easily let you manage:

	Sage Intacct
Audit and access controls.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Accounts Payable automation.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Bank connections and reconciliations.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Single or multiple chart of accounts, one login.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Drill down into detailed consolidating entries.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Create multiple levels in your organizational hierarchy and various stakeholder structures.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Choose consistent or different workflows, chart of accounts, period definition and lists across your multiple entities.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Multiple subledgers (e.g. AR, AP, order management, cash management ledgers) that can process transactions independently without degrading GL performance, and reduce the time it takes to close your books and report on financial results and outcome measures.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Multiple books, such as simultaneously keeping books on an accrual and a cash basis, to allow you to easily report business results to multiple stakeholders based on their needs and report preferences.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Spend management feature to ensure commented expenses are captured in budget/expense comparisons.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Custom workflows and system access, so you can maintain separation of duties, match an accounting workflow to your organization's operational process, or provide read-only access to stakeholders like executives, auditors or franchisors.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Report on all transactions and visibility into business performance

A modern accounting system provides in-depth, real-time insight into the organization, allowing you to capitalize on new opportunities, position for growth or quickly recognize the need for corrective action. You benefit from having a thorough picture of the financial performance of your organization, from high-level summaries down to the underlying transactions. To gain greater financial and operational insight, your system should deliver:

	Sage Intacct
The ability to create reports and dashboards that automatically combine operating dimensions with financial data, so you can analyze results for each operating entity, location, brand, region and more.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
The ability to slice and dice your financial data the way that you want without having to use external reporting tools or expand your chart of accounts.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Self-service reports and custom dashboards to bring speed and accuracy to ad-hoc stakeholder reporting, while delivering real-time updates and drill down capabilities for visibility and insight into the numbers.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Spend management that balances cash inflows and outflows to avoid overspending and ensure budgets are followed.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Reporting to give the insights that you need for growth and smart decisions, tracking costs and revenue by department, location, program, or others.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
The ability to customize dashboards and reporting for your specific user roles (district manager, regional manager, CFO etc).	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Cloud architecture

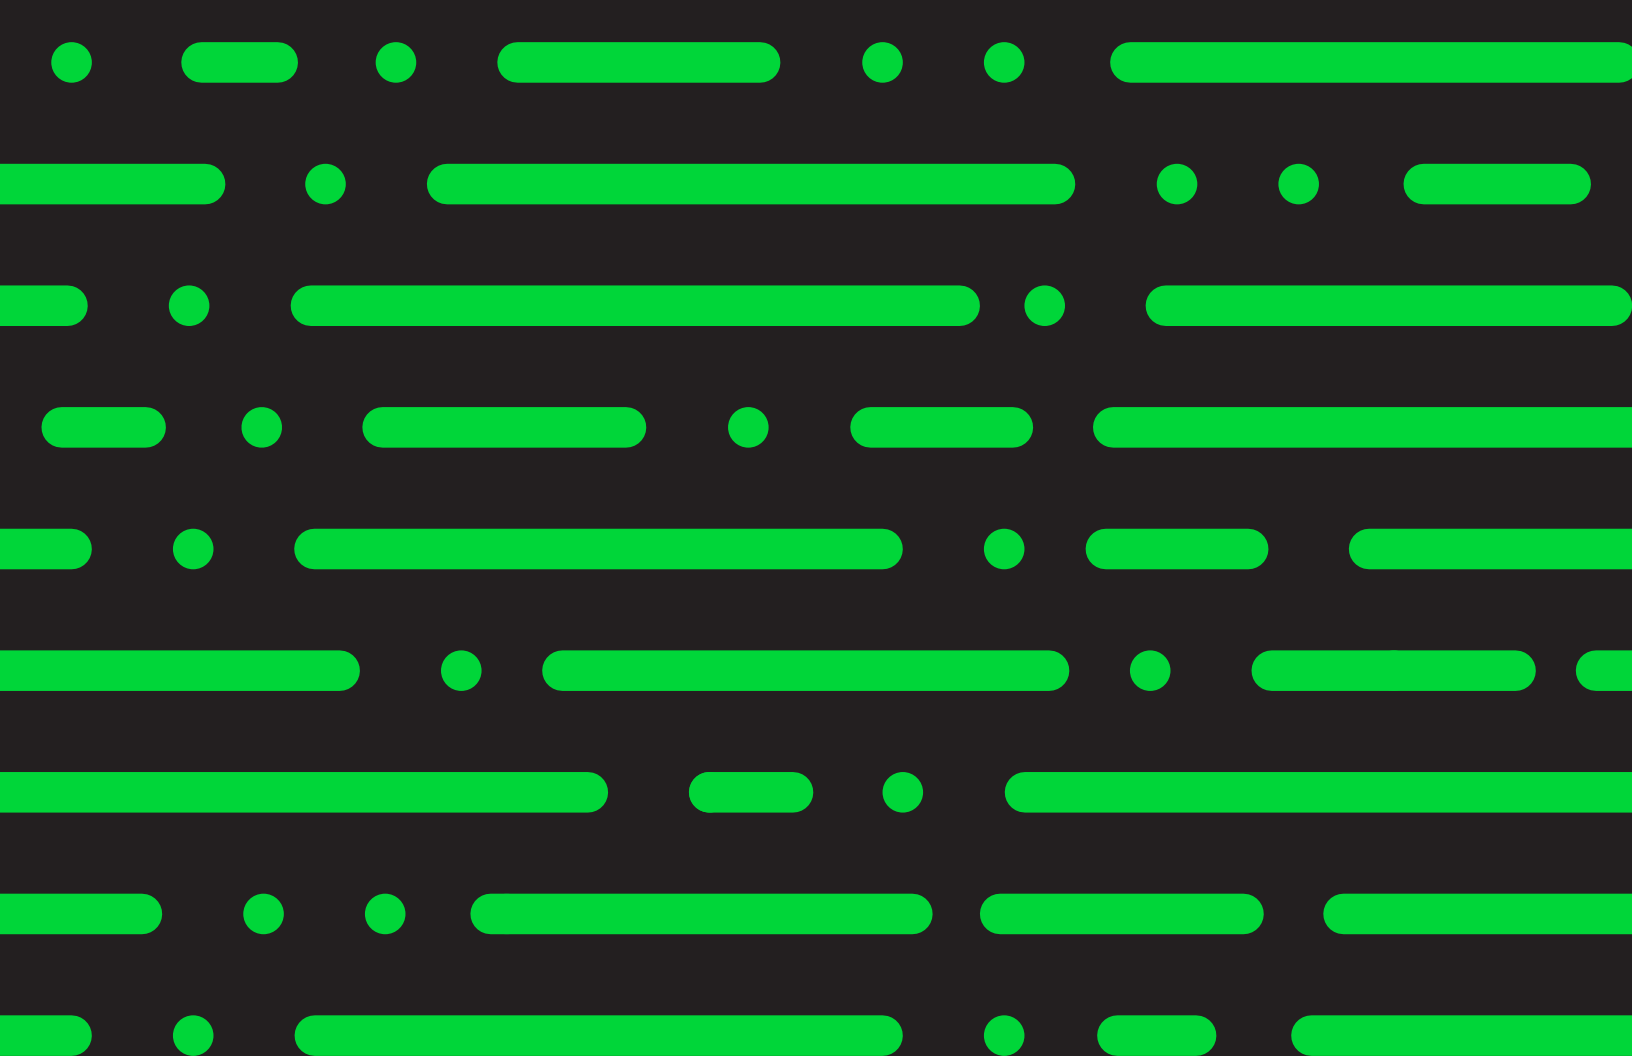

A modern accounting system is cloud-based, so you can lower IT costs, reduce technology risks, and improve productivity. Using a cloud-based system also gives you the flexibility to choose best-in-class solutions that enable ease of integrations with other leading software solutions across point of sale, reservation management systems and more. A best-in-class cloud accounting system delivers:

	Sage Intacct
On-demand scalability and performance in the cloud, which dramatically reduces your total cost of ownership by decreasing your hardware and software costs as well as your IT time and expense for maintenance, upgrades, and support.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Productivity resulting from anytime, anywhere access on any device and operating system.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Quarterly, automatic software updates that keep you current with the latest accounting standards and software features.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Open API that enables seamless integrations with hospitality applications such as:	
→ Point of sale systems	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
→ Property Management	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
→ Reservation Management	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
→ Inventory Management	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Seamless integrations with critical business systems such as:	
→ Payroll and ACH	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
→ Human Resource Management	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
→ Payment Processing	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

The right company

Be sure to work with a company that is committed to providing you with a world-class accounting system, hospitality expertise and which has the resources and product investment to provide you with ongoing value to enable your business growth. Your modern accounting system should come from a company that meets the following:

	Sage Intacct
Heritage and emphasis on providing a comprehensive yet user-friendly accounting system.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Proven longevity, sustained growth, and financial strength.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Knowledge and expertise from helping over 300 hospitality customers succeed.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Continued investment in innovation and support (product features update every quarter, along with new products yearly).	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Recognition for excellence by leading industry associations such as the AICPA.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Top ratings and reviews by customers from trusted third party sources like G2 Crowd and TrustRadius.	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Sage Intacct is the innovation and customer satisfaction leader in cloud financial management. Bringing cloud computing to finance and accounting, the Sage Intacct innovative and award-winning applications are the preferred financial applications of the AICPA.
